

Subject: NVS Personal Protective Equipment (PPE)

Q: Will the National Veterinary Stockpile (NVS) be able to support my requirements for additional PPE if I deplete my state inventories during a major outbreak?

A: Yes. The NVS stocks enough PPE to support 3,000 responders changing 5 times a day for 40 days. If APHIS approves your request for our assistance, our initial deployment will contain enough to protect 10 responders for 10 days changing 5 times a day. We will deploy more if incident command requests our assistance. In addition to what we stock, our contract for PPE includes a substantial surge capability that will allow incident command to order more PPE as it needs it.

Q: How can I access NVS assistance, if I need it?

A: The process for requesting emergency support from APHIS varies by state but generally includes

- Incident command (typically the State Veterinarian and the federal Area Veterinarian In Charge) concluding that the state does not have enough resources to respond to an outbreak,
- The APHIS regional director concurring with incident command's recommendation to request NVS assistance,
- A phone call to the NVS hot line 800.940.6524 requesting emergency assistance from the NVS,
- The order to deploy by the Deputy Administrator or Associate Deputy Administrator.

Q: Is there any way my state can purchase PPE at the same price as the NVS?

A: Yes. The NVS' contractor, Conney Safety, will sell PPE at our prices to states that wish to purchase for their own needs. Here is information on our contract if your state wishes to use it.

Contract number: GS-07F-93878
Order number: AG-6395-D-07-0429

Contractor representative: Mr. Brad May
Conney Safety
800-854-7938
317-372-9461 (mobile)
bmay@conney.com

Q: What does the contract include?

A: The contract includes individual pieces of PPE and complete kits. The list below provides pricing under the column labeled USDA Price. The contractor will also assemble PPE kits using different or substituted items.

Q: How can I be confident that your contractor can deliver?

A: We competitively bid our contract and carefully evaluated all bids before awarding the contract. We selected a contractor with an excellent reputation for service.

Q: Will your contractor be available to help support our needs during a major outbreak?

A: Yes. For large-scale outbreaks, we will task our contractor to provide an on site liaison.

Q: I don't know much about the NVS. What does it do? What are its responsibilities?

A: The National Veterinary Stockpile (NVS) is the nation's repository of supplies, vaccines, equipment, and other critical veterinary resources. Established by Homeland Security Presidential Directive 9 and operational in 2006, we are able to deploy large quantities of veterinary resources anywhere in the continental U.S. within 24 hours.

We exist because of the nation's concern after 9/11 that terrorists could release animal diseases of catastrophic proportions that would

- deplete State and local response inventories,
- generate surge material requirements that would overwhelm traditional commercial sources, and
- prevent unaffected States from providing significant help for fear of the threat crossing their borders.

Q: If I have more questions, how do I get answers?

A: Email us at nvs@aphis.usda.gov. We will respond quickly.
